Subject: Law Enforcement Protocol Event

Importance: High

Ms. Bayon Moore,

I am sending you this email to make you aware of an incident that occurred last night. Officers responded to a family disturbance service call where the caller reported the subject was hurting another family member. Upon arrival, officers determined the 30 year old male resident was experiencing a mental episode. The resident was restrained in handcuffs for everyone's safety due to his non-cooperative behavior and was to be sent for a mental health evaluation pursuant to W/I 5150. An ambulance was summoned to the residence and while awaiting the ambulance's arrival, the subject lost consciousness. CPR was initiated and the subject was transported to an area hospital via ambulance. As of this writing, the subject is in critical condition and it is unknown if/how long he will survive according to medical staff. We should have an update later today after the neurologist evaluates the resident.

County Protocol was invoked and Inspectors from the Contra Costa County District Attorney's Office are conducting an investigation into the incident with assistance from the Antioch Police Department. The investigation is still in the preliminary stages and additional facts and information are still being gleaned.

As of 0630 hours there have not been any inquiries by the media and a no press release has been disseminated. I will be available by phone should you need to follow up with me personally as I am currently the Acting Chief, while Chief Brooks is on leave.

Respectfully,

Captain Trevor Schnitzius #2840
